WHO WE ARE

A Factory-Direct Manufacturer, Built for Export.

Founded in 2019, Senhai Garage Doors is the export brand of Shaoguan Senhai Technology Co., Ltd., a China-based, ISO 9001-certified manufacturer specializing in custom garage doors for villas and residential developments. We design and produce sectional, sliding and designer garage doors in steel, aluminum and wood-look composite panels — sized to the opening, not the other way around.

We work directly with distributors, contractors and villa developers across the Middle East, supplying both finished doors and the smart-access hardware that goes with them — without a reseller layer between our factory and your price.

- Custom sizing for villa-scale openings, not just standard residential widths
- Steel, aluminum and wood-look composite panel options
- Flexible MOQ for new distribution partners, with sample units available
- Export packaging engineered for long-distance sea freight

IN THIS CATALOG

Four Collections, One Factory.

Every collection below can be customized in size, color and hardware. Use this page as a quick reference, then turn to each section for detail.

COLLECTION 01

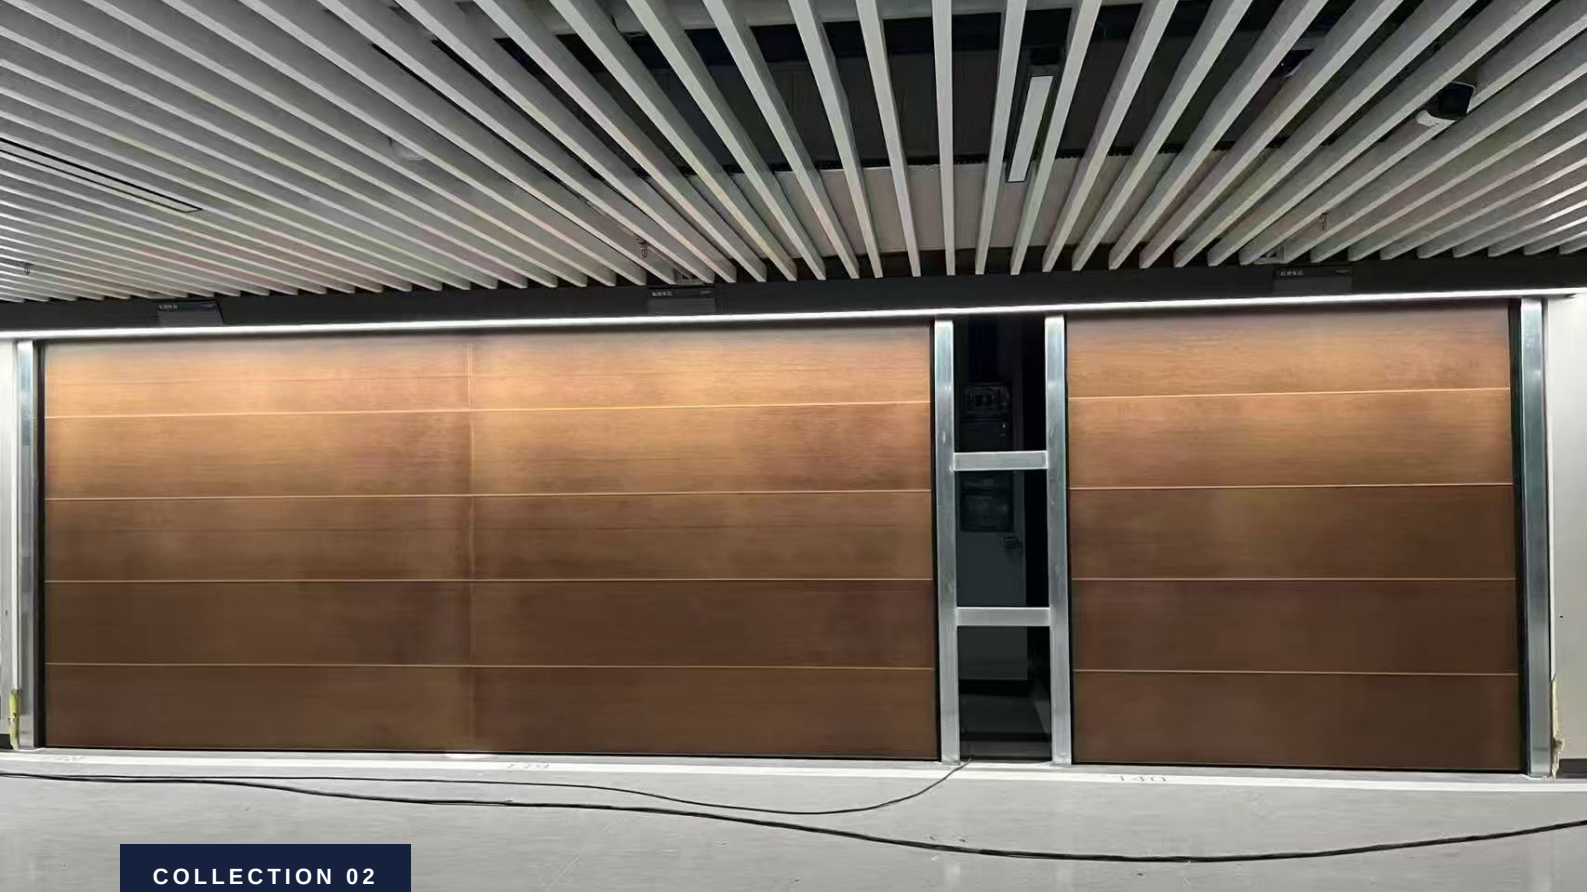

Modern Minimalist Series

Full-panel sectional doors with a smooth, monochrome finish — designed for contemporary villa facades where the door reads as architecture, not hardware. Available with or without vision panels, and finished to match the rest of the home's exterior palette.

- Sectional lift, suited to standard and oversized villa openings
- Smooth or lightly ribbed panel finish, matte or satin
- Optional glazed vision panel band
- Compatible with smart keypad and remote access hardware
- Available in white, graphite and custom RAL colors

On display at a project showroom — full-panel finish with integrated keypad entry.

COLLECTION 02

Wood-Look Collection

Wood-grain composite panels that bring the warmth of a timber door without the upkeep — no annual sealing, no warping in Gulf heat. Offered in slatted, plank and raised-panel patterns to suit both traditional and contemporary villa designs.

- Weather-stable composite core, built for high-heat, low-humidity climates
- Slatted, plank and raised-panel pattern options
- Multiple wood-tone finishes, from light oak to deep walnut
- Sectional or sliding configurations available

Wide wood-look composite door sized for a villa-scale double opening.

COLLECTION 03 · SIGNATURE

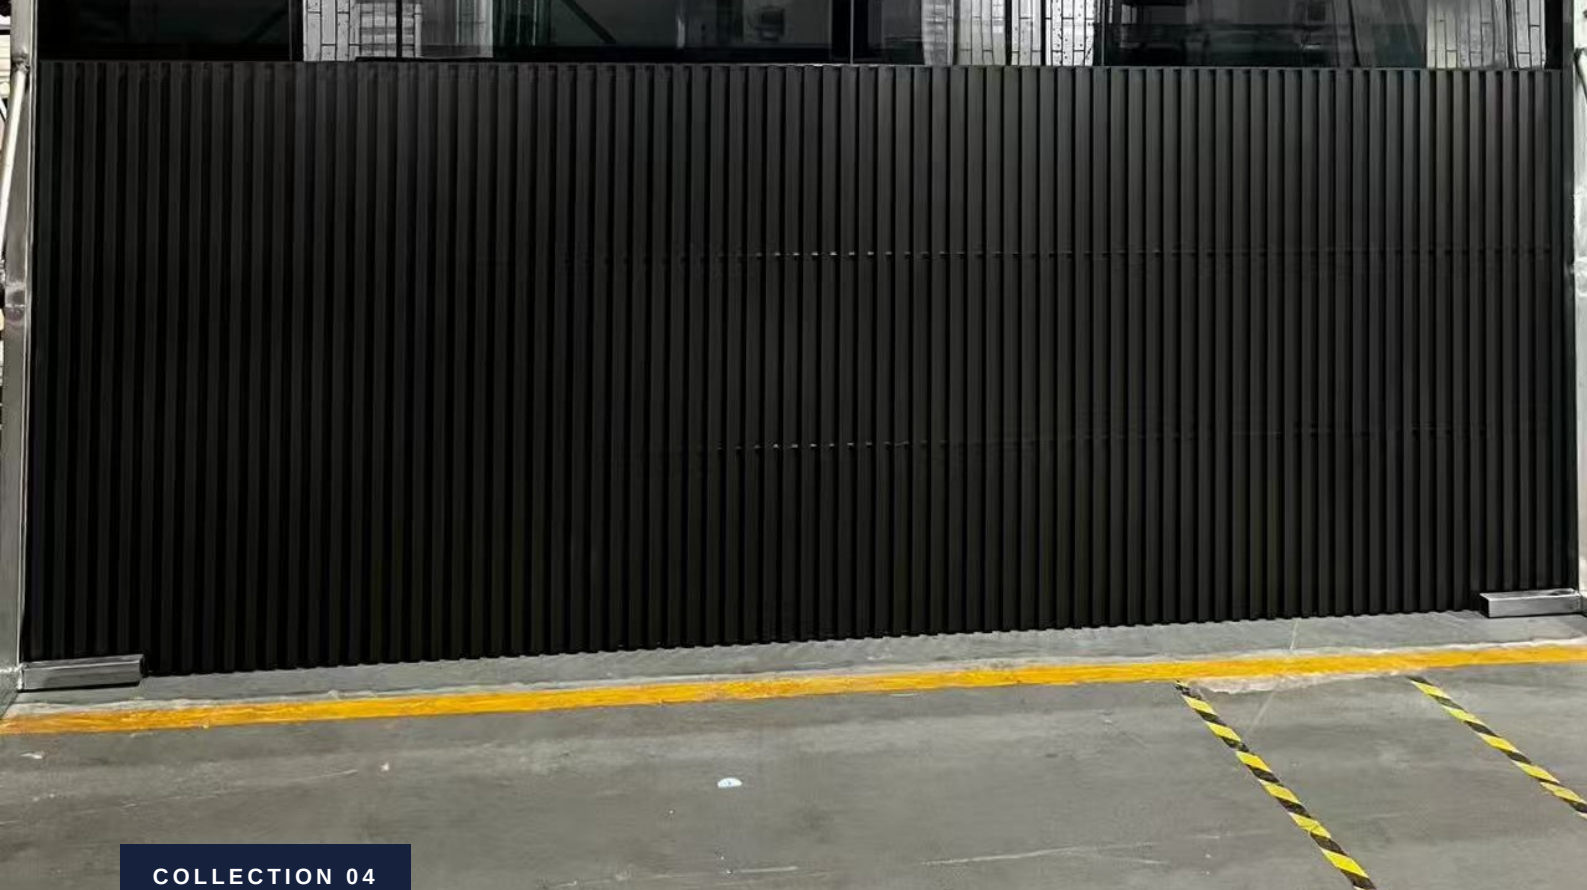

Signature Hidden Door Series

Our flagship architectural design: a flush, texture-finished panel that reads as a feature wall when closed, with the door mechanism fully concealed. Popular with developers who want the garage entrance to disappear into the building's design language.

- Flush-mounted panel with concealed track and hardware
- Aged bronze, copper and stone-effect textured finishes
- Recessed lock and biometric/keypad access points
- Made-to-measure for feature entrances and showpiece garages

Detail of the recessed, flush-mounted lock set into the textured panel.

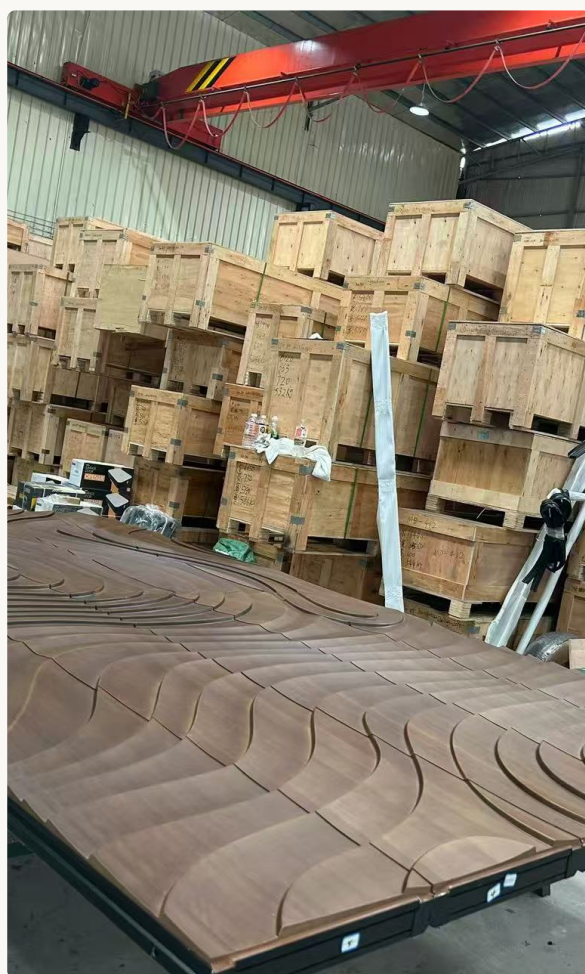

COLLECTION 04

Slat & Sliding Villa Doors

Slim vertical-slat and sliding panel designs for villas and basement parking entries where a sectional lift isn't practical. The louvre pattern also allows passive airflow — a common request for underground and semi-enclosed parking.

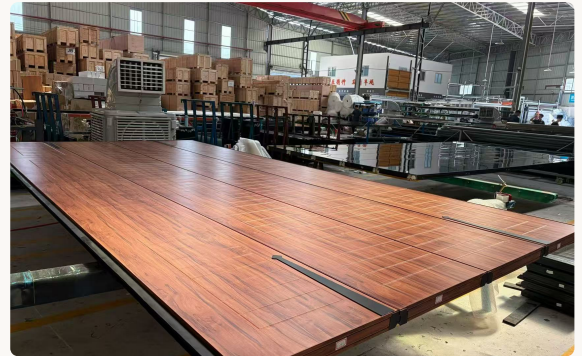

- Vertical slat / louvre panel for ventilated parking entries
- Side-sliding track configuration for low-headroom openings
- Matte black, graphite and wood-tone finishes
- Suited to basement, semi-basement and multi-bay entries

Custom wave-pattern surface detailing, shown mid-production — panel design is made to order.

FROM FACTORY TO FREIGHT

Built and Packed for Export.

01 · CUTTING

Precision Panel Cutting

Panels are cut to the exact opening dimensions supplied for each order.

02 · FORMING

Forming & Finishing

Surface texture, wood-grain and color finishes are applied on the production line.

03 · QC

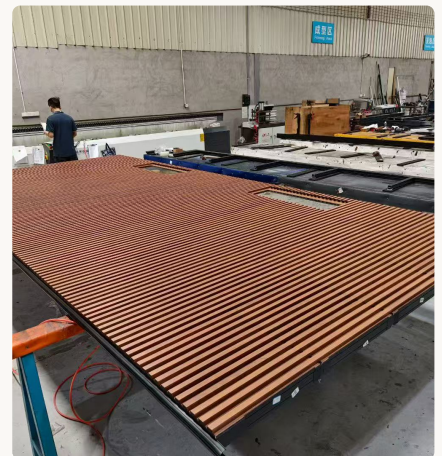

Quality Inspection

Every unit is checked for fit, finish and hardware operation before packing.

04 · EXPORT

Export Packaging

Doors are crated in reinforced wooden cases built for long-distance sea freight.

ACCESSORIES

Smart Openers & Access Hardware.

Marantec Comfort 380 — one of several opener brands compatible with Senhai doors.

Every Senhai door can be paired with a compatible smart opener and access system — from wall-mounted keypads to remote and smartphone-based control. Our doors are built to work with major opener brands, including Marantec, so distributors can offer a complete, ready-to-install package.

- Wireless remote and wall-keypad entry as standard
- Compatible with major third-party opener systems
- Optional biometric and PIN-code access on select door series
- Motor and hardware sourced to match local voltage standards

ACCESS & HARDWARE OVERVIEW

Entry methods	Remote, wall keypad, smartphone (select models)
Opener compatibility	Major third-party brands, incl. Marantec
Pre-installation	Factory pre-wired for opener fitment
Power standard	Matched to destination market voltage

LET'S WORK TOGETHER

Request Pricing, Samples or a Distribution Partnership.

Every door in this catalog is made to order — sizes, finishes and hardware are configured per project or per market. Get in touch with your requirements and we'll follow up with pricing, lead times and sample availability.
